Introduction

Progress to university with NCC Education qualifications

This booklet is designed to show the variety of options available once you complete your NCC Education qualification.

Whether you want to complete your studies overseas, online or at an international branch campus in-country, there are plenty of formal university progression options available to you. NCC Education has a number of agreements and recognitions with universities, enabling students to apply for an undergraduate degree programme in year 1 or with advanced standing/credit exemptions towards years 2 or 3. There are also a range of options for students looking to study at postgraduate level.

We now have agreements and recognitions with over 70 universities and institutes in many countries, including the UK, Australia, Canada, New Zealand and the USA. Students are also eligible to apply to several international branch campuses, including campuses in China, Malaysia, Singapore, Vietnam, UAE and Mauritius.

If you need further advice on progressing to further study with your NCC Education qualification, you can contact our customer services team in one of the following ways:

Major: Biology | Minors: Art, Mathematics and Biochemistry

"I have engaged in both internal and external **research opportunities** throughout my time at Carroll. I have worked on multiple research **projects with biology faculty**. Additionally, I have also **interned at various external research institutions**, including the Medical College of Wisconsin and the Harvard University Stem Cell Institute. From my experience conducting research studies off-campus, I learned that despite coming from a small liberal arts college, **I have been sufficiently prepared to carry out a well-designed research project and produce reliable findings like those from prestigious universities**. Thanks to the **International Scholarship** I have received from Carroll every year, I can **engage in this unique and amazing college experience.**"
