"I have engaged in both internal and external **research opportunities** throughout my time at Carroll. I have worked on multiple research **projects with biology faculty**. Additionally, I have also **interned at various external research institutions**, including the Medical College of Wisconsin and the Harvard University Stem Cell Institute. From my experience conducting research studies off-campus, I learned that despite coming from a small liberal arts college, **I have been sufficiently prepared to carry out a well-designed research project and produce reliable findings like those from prestigious universities**. Thanks to the **International Scholarship** I have received from Carroll every year, I can **engage in this unique and amazing college experience**."
